

Progress Monitor Workshop Agenda

Day 1

8:00: Introductions & Activity

8:30: The Art and Science of Frequent Progress Monitoring

Progress Monitor (Tier 3) is one of the most detailed and powerful assessment tools available via AIMSweb for measuring individual student progress over time. It is specifically used primarily for students at significant risk of academic failure and is designed to aid educators in determining the efficacy of instructional programs. It aids in efficient instruction and resource allocation by informing staff about of "what works" and "what doesn't work" for individual students. This comprehensive module will train LAMs on how to use Progress Monitor for determining students' "success levels," setting appropriate goals, determining instructional need, best practices for frequent data collection, describing interventions, and interpreting student data in meaningful ways.

11:30: Lunch (on your own)

12:30: Q&A, Review, and Implementation

In this segment, critical information to help inform your decision-making will be reviewed. We will also practice applying the information from this morning's modules via small-group work to prepare you to guide your sites in this critical function. Your trainer will provide instruction, guidance, help inform decision-making, and offer support throughout this activity.

1:00: Progress Monitor Software Training

Participants will use data generated from the practice exercises conducted earlier in the day and apply them to the AIMSweb Software for Progress Monitoring. Instruction and hands-on activities are combined to help [Local AIMSweb Managers \(LAMs\)](#) learn how to use the AIMSweb software in multiple ways, including setting up Progress Monitoring caseloads, conducting Survey Level Assessment within AIMSweb, entering goal scores, defining interventions within AIMSweb, entering progress monitor scores, understanding rates of improvement, and interpreting results over time.

3:45: Summary & Discussion Activities

Attendees will dialogue about today's learning experience and answer any final questions.

4:00: Survey & Dismissal
