Relevant assessment to support real growth

How do you measure what matters?
Use reliable, predictive data to inform instruction. The right technology can help you identify at-risk students early, monitor and report student progress, and predict high-stakes testing success.

aimsweb™Plus is a predictable, powerful, and proven tool to inform and improve student performance. With its robust set of brief, valid standards-aligned reading and math measures, you can screen and monitor progress for all students in grades K–8.

aimswebPlus: A whole lot more
aimswebPlus delivers the added benefit of new online measures and reports to better meet the needs of standards-based curriculum.

On target and online
- An additional layer of standards-based information needed to inform instruction
- Teacher-administered assessments for grades K-1
- Online testing for grades 2–8 (with the exception of oral reading fluency)
- Scores by reading and math domains
- Reports include Lexiles®, Quantiles®, Battery Composite Scores, and Individual Skills Scores
- New summary and detailed student and class reporting options
- Data reporting at all levels, from individual students to holistic district performance

Measure what matters
Foundational skills are vital to college and career success. With the high sensitivity to growth built into aimswebPlus measures, you can quickly evaluate student progress on the most critical foundational skills and more accurately predict performance on high stakes tests. Use brief, frequent progress monitoring for at-risk students to inform instructional intervention before it's too late. The new suite of math and reading measures include:
- Easy online administration options for universal screening, benchmarking, and progress monitoring
- Robust early literacy and numeracy skills assessment as called for in college and career readiness standards
- Reading measures include comprehension, oral and silent reading fluency, and vocabulary
- Math concepts and applications (e.g., word problems)
Harness the power of Plus for your students

Sold as an annual subscription, aimswebPlus is a K-8 assessment system that’s efficient and sensitive to growth. Get powerful standards-based screening, benchmarking, and progress monitoring for one all-inclusive price. Teachers, administrators, and specialists can share rich and informative data in a variety of easy-to-digest formats.

Easy-to-read reports, which are ideal for teachers and parents, present graphical, tabular, and narrative data on one printable page.

Crisp, clean, efficient reports enable effective data analysis for clear and precise communication.
